## Decision

- 1.1. Pursuant to section 63A of the Act, the Committee considered this application to reassess this substance approval to update its hazard classifications.
- 1.2. In making its decision, the Committee took into account best international practices and standards for the safe management of hazardous substances and all the effects associated with the reassessment.
- 1.3. The Committee have considered the matters raised in sections 4 to 8 of the Act, but, given the nature of the modified reassessment to apply the updated hazard classification involves only a specific aspect of the approval, there are no further considerations required in order to achieve the purpose of the Act.
- 1.4. The Committee considered the changes to the approval were appropriate and, for the reasons set out in the decision dated 17 May 2021, the Committee approved the application for reassessment.
- 1.5. The GHS classification as listed in the summary table above, and the controls set out in the Appendix apply to this substance.
- 1.6. The transitional provisions of the Labelling Notice, Safety Data Sheets Notice and Packaging Notice apply to this reassessed approval for a one-year transitional period which begins on 17 May 2021 and ends on 17 May 2022.
