Dear Sir and Madam,

I received a letter asking my consent on the Federal Street project. My view is that Auckland city does not lack a more than 50 floors high building in the CBD. Instead, a park building is necessary. If the parking building would be replaced by a recreation facilities, then people can be benefit from the project. However, the current project is to build a high rising building which lots of big cities now are trying to avoid. Although the project has its own commercial objectives, the amount of money can be invested for a better purpose and wellbeing of the city.

Best wishes, Yingzi
