

Kopu Marine Project – Comments on the draft conditions

Thanks to the EPA panel for getting us thru to this stage. It will be a vital boost to the area and the economy of the district.

Having read thru all the conditions of this Consent, the one we would like to see change is the lapse period – from 2 years to 5 years.

In these uncertain times, is there going to be any further disruptions and potential delays i.e lockdowns, lack of workforce.

Hopefully not, as it would be great to start moving forward again.

It is a lot of heavy reading, and there are a plenty of conditions to follow on the Consent, but we are hopeful that the naysayers will not put any obstacles in the way of progress.

Once again, thank you for your time and effort put into getting this Consent approved.

Regards
