To the panel,

I have recently received some correspondence from you regarding the proposed water storage reservoir going ahead in Kaikohe.

I received this correspondence because I own the property ; [REDACTED] Kaikohe.

I would like you to correspond with me further in regards to how this may affect my property personally.

My property is a small farm and we draw water from the stream for our stock.

The water we draw is solely for stock to drink and I am concerned that any water being taken from the catchment area further upstream will dramatically reduce the stream to the point that there is not enough for my animals. The stream was extremely low this past summer, to the point it was barely running.

I'm sure you can understand my concern at the potential implications this poses for my livelihood and also my obligations for the health and well being of my animals.

I wish to receive any and all correspondence related to this project.

Regards,

Carmen Zielinski
