My Comments are more concerns for my property which is in close proximity to the proposed dam. My issues are as follows:

- \* Will my property be deemed as a potential flood zone ~~once~~ the dam has been established?
- \* What are the risks of ~~the~~ the dam walls breaking?
- \* Will my house insurance go up? Now or in years to come?
- \* What measures/reports/guidance was used when weighing up the risk of flooding? we had a 1 in 500 year flood recently what's to say another anomaly doesn't occur in 1 or 2 years putting my family @ risk?
- \* In 5 years time when the water tables have moved, changed or depleted + we no longer can draw water from our springs, what comeback or proof do we have that this dam caused a lifesource for many to be changed? who will monitor? local hapu? + if changes are found then what? too late? tangata whenua nearby men have to purchase their water back? landowners buy water from FWHL?
- \* Can you guarantee the value of my house wont decrease being in close proximity?

Thank you for your comments
