---

Kane and Deborah Lee

Please note we have a shallow bore at [REDACTED] within 500 meters of Stage 5. Stage 1 shows drainage plans for this. We expect that our ground water and quality will not be upset because of any stage activities taking place during the development. Please confirm the safe guards and checks in place that ensure our safe access to ground water.

The current amount of traffic on Te Kowhai Road often makes it hard to exit and enter our property safely and the extra traffic flows caused by the development will only make this worse. It would be preferable for the speed limit to be reduced before development activities begin.

We do not oppose the development, however would like consideration of our requests above as the project is progressed.

Thank you

Kane and Deborah Lee
